

# CLASSIFICATION OF THE EUCALYPTS (*Angophora*, *Corymbia* and *Eucalyptus*)

Dean Nicolle

Version 5 | Nov 2021

**Cite as:**

Nicolle D (2021) *Classification of the eucalypts (Angophora, Corymbia and Eucalyptus) Version 5*.  
<http://www.dn.com.au/Classification-Of-The-Eucalypts.pdf>

Appendices listing new taxa added, modified, and rejected since publication of Version 4 (April 2019) are provided at the end of the document (p. 58–59).

## Taxonomy

**Genus** (common name, if any)

**Subgenus** (common name, if any)

**Section** (common name, if any)

**Series** (common name, if any)

**Subseries** (common name, if any)

**Species** (common name, if any)

**Subspecies** (common name, if any)

? = Dubious or poorly-understood taxon requiring further investigation

[ ] = Hybrid or intergrade taxon (only recently-described and well-known hybrid names are listed)

ms = Unpublished manuscript name

## Natural distribution (states listed in order from most to least common)

**WA** Western Australia

**NT** Northern Territory

**SA** South Australia

**Qld** Queensland

**NSW** New South Wales

**Vic** Victoria

**Tas** Tasmania

**PNG** Papua New Guinea (including New Britain)

**Indo** Indonesia

**TL** Timor-Leste

**Phil** Philippines

? = Dubious or unverified records

## Research

**O** **O**bserved in the wild by D.Nicolle.

**C** **C**herbarium specimens **C**ollected in wild by D.Nicolle.

**G(#)** **G**rowing at Currency Creek Arboretum (number of different populations grown).

**G(#)m** **G**rowing at Currency Creek Arboretum, reproductively **m**ature.

**-(#)** Has been grown at CCA, but the taxon is no longer alive.

**-(#)m** At least one population has been grown to maturity at CCA, but the taxon is no longer alive.

**Synonyms** (commonly-known and recently-named synonyms only)

**Taxon name**

? = Indicates possible synonym/dubious taxon

Angophora (apples)				E. subg. <i>Angophora</i>
