

**The largest river red gums (*Eucalyptus camaldulensis*) in Australia,  
as measured by Dean Nicolle**

**10<sup>th</sup> April 2021**

Ranked from largest to smallest by total points. Points are calculated using the *National Register of Big Trees* (Australia) formula,  
which follows that used by *American Forests* for the *National Register of Champion Trees* (USA):

Total points = Trunk circumference at Chest Height (in inches) + Height (in feet) + ¼ average canopy spread (in feet).
