

**The largest river red gums (*Eucalyptus camaldulensis*) in Australia,
as measured by Dean Nicolle**

15th November 2024

Ranked from largest to smallest by total points. Points are calculated using the *National Register of Big Trees* (Australia) formula,
which follows that used by *American Forests* for the *National Register of Champion Trees* (USA):

Total points = trunk circumference at chest height (in inches) + height (in feet) + ¼ average canopy spread (in feet).
